TECHNICAL PROJECTS

VoiceKhata - AI-Powered WhatsApp Ledger (Node.js, Next.js, PostgreSQL, BullMQ, Gemini)
(Live Link) — GitHub **(May - Present)**

- **Automated accounting** for small businesses using an AI pipeline **(WhatsApp API, Gemini, Llama-3)** to instantly transcribe mixed-language voice notes into structured PostgreSQL ledgers, **eliminating manual data entry**.
- Architected a **fault-tolerant backend (Node.js, Redis, BullMQ)** with AI fallbacks to ensure zero data loss, alongside a **Next.js** dashboard and **automated PDF invoicing** to accelerate payment collections.

NowledgeHub - AI Learning Platform (MongoDB Atlas Vector, Gemini)
(Live Link)—GitHub **(Jan - Feb 2026)**

- Integrated the **Tavily API** to power an autonomous **deep research agent** alongside a **custom RAG pipeline**, utilizing **MongoDB Atlas Vector Search** and **LangChain.js** to process and retrieve context from complex PDFs.
- Architected real-time collaborative study rooms via **Socket.IO**, applying secure coding practices for **JWT-based authentication and email verification**.

NexusDesk - AI-Powered Support System (Python/Django, React, Docker, Azure)
GitHub **(Mar - Apr 2026)**

- Engineered an AI support agent using Gemini 2.5 Flash that automates **ticket categorization** and **sentiment analysis** through strict JSON-mode output parsing.
- Deployed a **containerized Azure VM environment using Docker Compose and Nginx** as a reverse proxy for secure TCP/IP routing and **DNS mapping**.
- Optimized dashboard performance via **PostgreSQL aggregations (Annotate/Count)**, offloading heavy computations to reduce query **latency by 40%**.
